KUSHAL BHOIR

Mumbai, India | +91 8767784520 | bhoirkushal2005@gmail.com | Portfolio | GitHub | LinkedIn

Summary

Results-driven data professional with expertise in Machine Learning, Deep Learning, and data analytics. Skilled in using Python and SQL for data processing, and Power BI, Tableau, and Excel for creating interactive dashboards and visualizations. Strong understanding of statistical analysis and predictive modelling, enabling the development of intelligent systems for real-world problems

Experience

Data Analysis Intern, BizTech **Feb 2026 – Mar 2026**

- Cleaned raw datasets by handling missing values, removing duplicates, and structuring data for analysis.
- Performed EDA to identify trends, patterns, and relationships using statistical techniques and visualizations.
- Built interactive dashboards using Microsoft Power BI for clear data visualization and reporting.

Education

University of Mumbai – B.Sc. Information Technology | 8.33 CGPI **Jul 2022 - Jun 2025**

Pune University – Higher Secondary Education (HSC in Science) | 60.00% **Jul 2020 - Mar 2022**

Pune University – Secondary Education (SSC) | 76.80% **Jun 2019 – Jul 2020**

Projects / Course

QSpiders Global. Course | SQL **Aug 2024 – Aug 2025**

Hospital Management

- Queried a relational database for managing patients, doctors, appointments, treatments, and billing.
- Wrote complex SQL queries using JOIN, GROUP BY, aggregate functions, and date filtering to generate reports like monthly revenue, doctor performance, and patient visit summaries.
- Created analytical queries for billing reports, treatment costs, appointment tracking, and patient insights.

Imarticus Learning. Course | Data Analyst & Scientist **Aug 2025 – Apr 2026**

- **Data Analysis |HR Analysis (Python / Statistics / SQL / Power BI)**
  - Developed to identify key factors influencing employee attrition and performance using data analysis techniques.
  - Performed Exploratory Data Analysis (EDA) to uncover trends, patterns, and anomalies in employee data.
  - Built interactive dashboards using Microsoft Power BI to track KPIs and business metrics.
  - Used SQL for efficient data extraction, transformation, and analysis from structured databases.
- **Data Science | Fake Job Detection System (Machine Learning / Deep Learning / NLP)**
  - Developed an intelligent system to detect fraudulent job postings using Machine Learning techniques.
  - Performed data cleaning, preprocessing, and text normalization using Python and NLP techniques.
  - Extracted textual features using TF-IDF vectorization for effective model training.
  - Improved model performance using Deep Learning techniques such as LSTM.
  - Evaluated model performance using metrics like Accuracy, Precision, Recall, and F1-score.
  - Deployed the model using Gradio and Hugging Face for real-time prediction and user interaction.

Achievement / Activities

AI / Tech Solution - Nebulon Hackathon 2026

University of Mumbai / Team Matrix

Topic: SME Business Health & Insights Platform

- Led a team to design and develop an AI-powered solution for SME business insights and decision support.
- Built a Machine Learning model using Linear Regression to predict inventory demand and optimize stock planning.
- Developed a GenAI chatbot using LangChain and Llama 3.1 to enable no-code data analysis and insights generation.
- Utilized Python, Flask, Pandas, HTML, CSS, and JavaScript to build and integrate the full-stack application.

Skills

Programming: Python

Python Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn

Machine Learning: Supervised Learning & Unsupervised Learning

Deep Learning: ANN, CNN, RNN

Natural Language Processing (NLP): Text preprocessing, TF-IDF, Transformer

Databases: MySQL

Data Visualization: Power BI, Microsoft Excel, Tableau

Statistics: Descriptive Statistics, Inferential Statistics, Probability, Hypothesis Testing
