

Kushal Navin Bhoir

Mumbai, India | +91 8767784520 | bhoirkushal2005@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Results-driven data professional with hands-on expertise in Python, Machine learning, Deep Learning, NLP, MYSQL, Power BI, Tableau, Excel, and statistics. Proven experience in data cleaning, exploratory data analysis (EDA), developing interactive dashboards, and predictive modelling, with the ability to the develop intelligent systems for real-world problem and transform raw data into meaningful business solutions.

Professional Experience

Data Analysis Intern| BizTech, MumbaiFeb 2026 - Mar 2026

- Cleaned and pre-processed raw datasets by handling missing values, removing duplicates, standardizing data formats, and transforming unstructured information into analysis-ready datasets to ensure data accuracy and consistency.
- Conducted comprehensive Exploratory Data Analysis (EDA) using Python, SQL, and statistical techniques to identify trends, correlations, customer behaviour patterns, and key business insights through data visualization and analytical reporting.
- Designed and enhanced interactive dashboards in Microsoft Power BI with dynamic visualizations, KPI tracking, filters, and performance metrics to support data-driven decision-making and business reporting.

Skills

- Interpersonal Skills:** Strong Verbal and Written Communication, Team Player, Customer service oriented, Adaptative to any environment.
- Database Management:** SQL, Microsoft Excel
- Programming Language:** Python
- Python Libraries:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
- Statistics:** Descriptive Statistics, Inferential Statistics, Hypothesis Testing, Z-test, T-Test, ANOVA, Chi-Square Test
- Machine Learning Algorithms:** Linear Regression, Logistic Regression, Decision Tree, Random Forest, Bagging, Boosting (AdaBoost, Gradient Boost, XG Boost), SVM, KNN, PCA, KMeans Clustering, Hierarchical Clustering, Time Series, Association Rule Mining, RFM
- Deep Learning Algorithms:** Artificial Neural Networks (ANN), Convolution Neural Networks (CNN), Recurrent Neural Networks (RNN), Natural Language Processing (NLP)
- Visualization:** Power BI, Tableau
- Cloud Deployment:** AWS Basics, Gradio, Hugging Face

Personal Projects

Fake Job Detection System (Machine Learning | Deep Learning | NLP | Python)

- Upgraded and optimized a Fake Job Detection System using Machine Learning, NLP, TF-IDF vectorization, and LSTM-based Deep Learning techniques to accurately classify fraudulent job postings and improve recruitment security.
- Performed data preprocessing, feature engineering, and model evaluation using Accuracy, Precision, Recall, and F1-score metrics, achieving 97% accuracy, and deployed the solution using Gradio and Hugging Face for real-time prediction and interactive user access.

Mobile Sales Intelligence Analytics Platform (Python | SQL | Microsoft Power BI | Excel | DAX)

- Created an end-to-end sales analytics platform to analyse revenue, customer behaviour, regional sales performance, and product trends across multiple mobile brands using Python, SQL, and advanced data analytics techniques.
- Performed data cleaning, transformation, EDA, and KPI analysis using Power Query and DAX while designing interactive Power BI dashboards to visualize sales trends, customer ratings, payment methods, and monthly business growth insights.

Employee Attrition Analytics (Python | SQL | Statistics | Microsoft Power BI)

- Developed a data-driven HR Analytics solution to analyse employee attrition, workforce trends, employee performance, and organizational insights using Python, SQL, and statistical analysis techniques.
- Conducted Exploratory Data Analysis (EDA), correlation analysis, and KPI reporting while building interactive Power BI dashboards to support strategic HR decision-making and workforce optimization.

SME Business Health & Insights Platform (Python | Flask | Machine Learning | LangChain | Llama 3.1 | Pandas)

- Led the development of an AI-powered business intelligence platform planned to provide SMEs with data-driven insights, business performance monitoring, and intelligent decision-support capabilities.
- Built an inventory demand forecasting system using Linear Regression and Added a GenAI chatbot using LangChain and Llama 3.1 for no-code data analysis, interactive business query handling, and intelligent reporting.

Education

B.Sc. Information Technology University of Mumbai	2022 - 2025 8.33 C.G.P. A
Higher Secondary Education (HSC in Science) Pune University	2020 - 2022 60.00%
Secondary Education (SSC) Pune University	2019 - 2020 76.80%

Additional Information

Certifications: Post Graduation in Data Science and Analytics (Imarticus Learning)Aug 2025 - Apr 2026

Achievements: Nebulon Hackathon 2026 (University of Mumbai)

Languages known: English (R/W/S), Hindi (R/W/S), Marathi (R/W/S)
