KUSHAL BHOIR

Mumbai, India | bhoirkushal2005@gmail.com | +91 8767784520 | kushal-bhoir05

Summary

Results-driven data professional with hands-on expertise in Python, machine learning, SQL, Power BI, Tableau, Excel, and statistics. Proven experience in data cleaning, exploratory data analysis (EDA), and developing interactive dashboards, complemented by foundational skills in building machine learning models. Adept at transforming raw data into actionable business insights that drive strategic decision-making. Actively seeking an entry-level role as a Data Analyst, BI Analyst, or Junior Data Scientist to leverage analytical skills and contribute to a data-driven environment.

Experience

BizTech . Internship | Data Analysis | Feb 2026 – Mar 2026

- Performed data cleaning and preprocessing on raw datasets.
- Conducted EDA to analyze trends and patterns.
- Built Power BI dashboards for data visualization and reporting.

Education

University of Mumbai – B.Sc. Information Technology | Jul 2022 - Jun 2025
Percentage : 8.33 CGPI

Pune University – Higher Secondary Education (HSC in Science) | Jul 2021 - Mar 2022
Percentage : 60.00%

Pune University – Secondary Education (SSC) | Jun 2019 – Jul 2020
Percentage : 76.80%

Projects / Course

QSpiders Global . Course | SQL | Aug 2024 – Aug 2025
Hospital Management

- Designed and queried a relational database for managing patients, doctors, appointments, treatments, and billing.
- Wrote complex SQL queries using JOIN, GROUP BY, aggregate functions, and date filtering to generate reports like monthly revenue, doctor performance, and patient visit summaries.
- Created analytical queries for billing reports, treatment costs, appointment tracking, and patient insights.

Imarticus Learning . Course | Data Analyst & Scientist | Aug 2025 – Apr 2026

- **Data Analysis |HR Analysis (Python / Statistics / SQL / Power BI)**
  - Developed to identify key factors affecting employee attrition and performance.
  - Performed Exploratory Data Analysis (EDA) to identify trends, patterns, and anomalies.
  - Built interactive Power BI dashboards to track KPIs and business metrics.
  - Used SQL for data extraction, transformation, and analysis.
- **Data Science | Smart Email Classification System (Machine Learning / Deep Learning / NLP)**
  - Developed to automatically categorizes emails into multiple classes like business, spam, Advertisement, Resume etc.
  - Performed data preprocessing and NLP using Python
  - Extracted features using TF-IDF
  - Developed baseline model using Logistic Regression (Machine Learning)
  - Improved performance using LSTM (Deep Learning)
  - Assessed model using Accuracy, Precision, Recall, and F1-score

Achievement / Activities

AI / Tech Solution - Nebulon Hackathon 2026
University of Mumbai / Team Matrix
Topic : SME Business Health & Insights Platform

- Led a team to develop an AI-powered solution for SME business insights
- Built ML model (Linear Regression) for inventory demand prediction
- Developed GenAI chatbot (LangChain, Llama 3.1) for no-code data analysis
- Used Python, Flask, Pandas, HTML, CSS, JavaScript
- Awarded Exceptional Performance

Skills

Programming : Python
Python Libraries : NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn
Machine Learning : Supervised Learning & Unsupervised Learning
Deep Learning : ANN, CNN, RNN, forward propagation, backpropagation, and optimization techniques
Natural Language Processing (NLP): Text Classification, TF-IDF, Tokenization
Databases : MySQL
Data Visualization : Power BI, Microsoft Excel, Tableau
Statistics : Descriptive Statistics, Inferential Statistics, Probability, Hypothesis Testing
